

UX Development Engineer – Willingham

The company & products

Imagen helps sports, media and enterprise companies manage and distribute their ever-growing video libraries, enabling fast, easy, secure and controlled access to content through a highly customisable content portal.

Speed to market, greater choice and ease of access are critical to maximising the value of content. Imagen allows rights holders to monetise near-live video assets more effectively via a premium content distribution portal. Offering pin-point time-based video searching, instant playback, online editing and high-speed file transfer, Imagen unlocks the full commercial potential in media libraries.

With customers including the Premier League, BBC Studios, IMG, BP, Press Association, Endemol, Lad Bible, NATO, Channel 4, Reuters, AON and many more, Imagen offers a comprehensive and powerful platform to ensure that video is managed in the most efficient and cost-effective way. As the sheer amount of video data grows throughout the world, Imagen strives to create solutions that can generate more value from archive and near-live video.

And, hot off the blocks is our new *Imagen Go* Software-as-a-Service solution-bringing AI powered ingest and indexing to a broad selection of customers.

The person

Are you obsessive about good design? Are you passionate about building excellent web end-user experiences? Are you driven by working on cutting edge technologies in a small but highly driven team of software developers? If so, then we'd love to hear from you!

Imagen is looking to recruit an ambitious UX Design Engineer to help us to develop the next generation of media management platforms. The successful applicant will be involved in developing cutting edge consumer UI for Imagen Pro and Imagen Go, and designing innovative solutions to delight customers such as the NBA and Premier League.

Key responsibilities:

- Liaise with customers to discuss requirements, understand personas and user stories, and gain feedback from UX testing.

- Develop wireframes and mock-ups, suitable for evaluation and feedback, from internal stakeholders and customers alike.
- Extend and improve ImagenWeb, our web based user / admin UI tier, and work to develop a library of custom themes.
- Work with the broader development team to extend and improve our end to end platform.
- Liaise with technical support colleagues to troubleshoot and resolve customer issues.

Experience & Qualifications:

- In-depth experience with JavaScript, CSS, HTML to build superlative User Experiences is essential.
- Experience with design / prototyping tools and techniques (e.g. Figma, Adobe XD) is desirable.
- Experience of mobile application development (iOS, Android) is a bonus.
- Experience with PHP, PowerShell, SQL, XML, XSL, Docker, Kubernetes, Azure, AWS is beneficial, but not essential.
- Preferably educated to degree level, but consideration will be given to candidates with relevant experience.
- Excellent collaboration skills (including when working remotely), and an ability to Get Things Done as part of a larger team.
- Excellent communication skills with the ability to convey ideas and offer solutions to internal and external stakeholders.
- Excellent organisational skills with the ability to manage priorities and work to deadlines.
- Confidence working with internal and external clients at all levels.
- Excellent analytical skills for troubleshooting and problem solving.
