

# Senior Development Engineer

## The company & products

Imagen helps sports, media and enterprise companies manage and distribute their ever-growing video libraries, enabling fast, easy, secure and controlled access to content through a highly customisable content portal.

Speed to market, greater choice and ease of access are critical to maximising the value of content. Imagen allows rights holders to monetise near-live video assets more effectively via a premium content distribution portal. Offering pin-point time-based video searching, instant playback, online editing and high-speed file transfer, Imagen unlocks the full commercial potential in media libraries.

With customers including the Premier League, BBC Studios, IMG, BP, Press Association, Endemol, Lad Bible, NATO, Channel 4, Reuters, AON and many more, Imagen offers a comprehensive and powerful platform to ensure that video is managed in the most efficient and cost-effective way. As the sheer amount of video data grows throughout the world, Imagen strives to create solutions that can generate more value from archive and near-live video.

And, hot off the blocks is our new *Imagen Go* Software-as-a-Service solution-bringing AI powered ingest and indexing to a broad selection of customers.

## The person

Do you have a proven track record in software development, including developing APIs and designing complex systems? Do you have experience of working with a large code base with a desire to extend, enhance and modernise it?

That's great! But are you also the sort of person who, when you hear about a problem that someone needs to solve, find yourself thinking about the many ways in which you might go about addressing it? Can you visualise how complex systems fit together and work out how to expand them? Are you happy to explain your findings to your team mates and train them in new areas?

Imagen is looking to recruit an ambitious and experienced full stack engineer like you, to help us extend and integrate the Imagen Platform with a broad ecosystem of other products, to build solutions that meet the workflow needs of tomorrow's Enterprise, Sports and Media customers.

## Key responsibilities:

- Working within a SCRUM Development team to build new product capabilities, extending out to new platforms and addressing new use cases.
- Deliver high-quality, documented and scalable software.
- Enhancing the existing code base with a view to gradually modernise.
- Liaise with technical support colleagues to troubleshoot and resolve customer issues.

## Experience & Qualifications:

- At least 5 years experience in a Software Development role.
- **Demonstrable experience of C#, SQL, XML and REST.**
- Experience of C++ is advantageous but not essential.
- **Detailed understanding of API design, security and multi-threaded programming.**
- Preferred : AWS, Azure, Docker, Kubernetes, Cloud microservices.
- **Experience with Agile software development processes is advantageous, but not essential.**
- Preferably educated to degree level, but consideration will be given to candidates with relevant experience.
- Excellent collaboration skills (including when working remotely), and an ability to Get Things Done as part of a larger team.
- Fantastic communication skills with the ability to convey ideas and offer solutions to internal and external stakeholders.
- Good organisational skills, with the ability to manage priorities and work to deadlines.
- Outstanding analytical skills for troubleshooting and problem solving.

## Summary

This is a unique opportunity to join a fast growing, award winning company with an international and well recognised client base. In addition to a competitive salary, a comprehensive benefits package and 25 days' holiday is on offer to the right candidate.
