

# Software Test Engineer

## The company & products

Imagen helps sports, media and enterprise companies manage and distribute their ever-growing video libraries, enabling fast, easy, secure and controlled access to content through a highly customisable content portal.

Speed to market, greater choice and ease of access are critical to maximising the value of content. Imagen allows rights holders to monetise near-live video assets more effectively via a premium content distribution portal. Offering pin-point time-based video searching, instant playback, online editing and high-speed file transfer, Imagen unlocks the full commercial potential in media libraries.

With customers including the Premier League, BBC Studios, IMG, BP, Press Association and many more, Imagen offers a comprehensive and powerful platform to ensure that video is managed in the most efficient and cost-effective way. As the sheer amount of video data grows throughout the world, Imagen strives to create solutions that can generate more value from archive and near-live video.

And, hot off the blocks is our new *Imagen Go* Software-as-a-Service solution-bringing AI powered ingest and indexing to a broad selection of customers.

## The person

Are you a keen and focused Software tester? Are you passionate about excellent web end-user experiences? If so, then we'd love to hear from you!

Imagen is looking to recruit an experienced Software tester with a strong technical background to help us test the next generation of media management platforms. The successful applicant will be involved in manually testing our cutting edge consumer UI for Imagen Pro and Imagen Go, as well as expanding our automated testing suite. They will be a strong communicator, working as part of a highly technical and interdisciplinary development team, contributing their knowledge, inspired problem-solving skills and extensive experience.

## Key responsibilities:

- Assess user interfaces to ensure a positive user experience.
- Use applications as part of the Imagen platform and provide feedback on usability and functionality.
- **Develop test plans and scripts to automatically test software.**
- Contribute to the ongoing improvement of processes and resources.

**imagen.io**

## Experience & Qualifications:

- Experience of testing web-based applications.
- Able to focus with attention to detail.
- Experience of automated testing tools such as Selenium.
- Experience of coding / scripting (e.g. Python).
- Experience of MySQL, XML and REST API testing.
- Experience with Agile software development processes is advantageous, but not essential.
- Preferably educated to degree level, but consideration will be given to candidates with relevant experience.
- Excellent communication skills with the ability to communicate in a clear, concise and professional manner.
- Excellent organisational skills with the ability to manage priorities and work to deadlines.
- Excellent analytical skills for troubleshooting and problem solving.

## Summary

This is a unique opportunity to join a fast growing, award winning company with an international and well recognised client base. In addition to a competitive salary, a comprehensive benefits package and 25 days' holiday is on offer to the right candidate.
