

TAME TERRORBYTE, YOUR COLLABORATION KILLER

**Ever tried to share large files in a hurry?
You may be waiting a long time.**

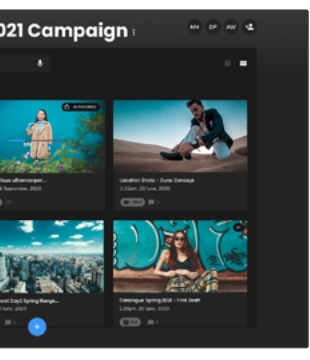

The growing popularity of video has given marketers greater scope to be creative when telling their brand story. Video, however, is often delivered in professional formats that require conversion to friendly formats – such as MP4. And then there's the sending of video files.

When you're sending large files, there's nothing more frustrating than watching progress bars grind to a halt or emails bounce from exceeding the attachment limit. Equally frustrating, is trying to access a file only to find it has an expired link.

INTRODUCING IMAGEN GO

Imagen Go is a branded media project space. It enables marketing teams and creative agencies to store, organise, share and collaborate on videos, images and audio files.

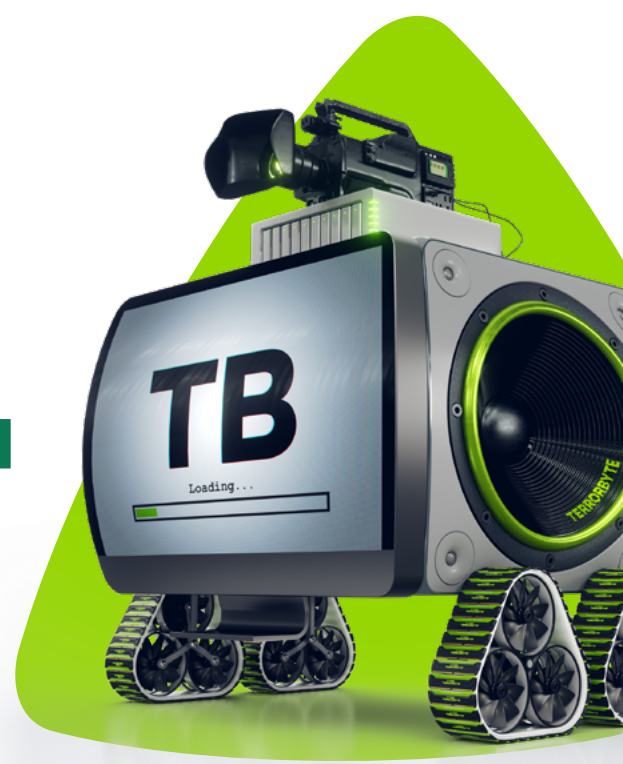

Designed specifically with video in mind, this collaboration platform makes it easy for agencies and marketers to collaborate on creative projects and bring campaigns to market faster.

- Centralise your digital media files in one place
- Collaborate, review and approve
- Easy to set up and ready to go
- Smart AI media tagging so your content can be discovered quickly
- Fast, simple and secure file sharing
- Customise with logo and brand colour

LET'S GO! SIGN UP NOW FOR A FREE TRIAL

Simplify, centralise and automate processes with one easy-to-use highly intuitive digital asset management platform. **Visit imagen.io/go to sign up.**

Say no to failed attempts to share large files...

GO FOR SHARING FILES, OF ANY SIZE, INSTANTLY

Add collaborators directly to projects and send invite links to share access to files online without delivery problems, format issues and playback issues.

Say no to waiting for overweight files...

GO FOR SEAMLESS COLLABORATION

Bring your campaign team and media assets together in one central content hub so everyone can work more efficiently with automated notification emails and instant in-app updates.

Say no to long email approval chains...

GO FOR TIME TO BE CREATIVE

Remove ambiguity when collating feedback with smart tools that enable users to add precise annotations to video timelines and contextual comments to images.
